INTERNSHIP PRESENTATION

Data Analytics with Python & Power BI

8-Week Internship

STUDENT NAME

Piyush Kumar

ENROLLMENT NUMBER

2410030021

PROGRAM & SEMESTER

B.Tech CSE • 5th Semester

ORGANIZATION

EduSkills Academy

Internship Overview

A structured 8-week learning journey in data analytics

Domain

Data Analytics with Python & Power BI

Duration

8-week internship program

Focus

Python • Pandas • SQL • Power BI • Visualization

- Built foundations in Python for data analysis.
- Learned data cleaning and preprocessing with Pandas.
- Developed SQL skills for data extraction and analysis.
- Explored Power BI modeling, DAX, visualization and collaboration.
- Applied skills through real-world projects and a capstone dashboard.

Learning Objectives

Core capabilities developed during the internship

Python for Analysis

Environment setup, core Python and analytics

Data Preparation

Cleaning and preprocessing using Pandas.

SQL Analytics

SQL fundamentals, advanced SQL techniques and data e

Business Intelligence

Power BI basics, data modeling, DAX and a

Integrated Workflow

Python + SQL + Power BI integration and co

Project Practice

Sales, customer behavior and e-commerce analytics proje

Python for Data Analysis

From environment setup to practical data visualization

PYTHON SKILLS

- Environment setup for data analytics.
- Core Python concepts for data analysis.
- Python for data extraction and analytical workflows.
- Python for data visualization.
- Integration of Python with Power BI.

Python

Data

Analysis

Visualization

Data Cleaning, Pandas & SQL

Turning raw data into analysis-ready information

Data Cleaning & Preprocessing

Pandas-based cleaning and preprocessing workflows for reliable analysis.

SQL Fundamentals

SQL foundations for working with structured data and analytical queries.

Advanced SQL

Advanced SQL techniques and data extraction for deeper analysis.

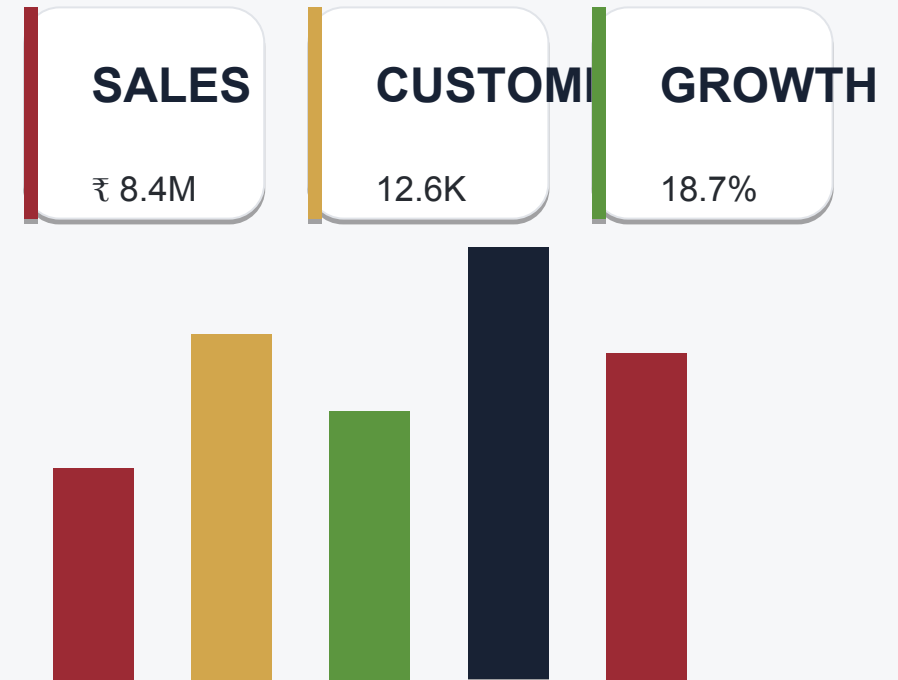

Python + SQL

Integration of Python and SQL for practical data extraction workflows.

Power BI & Business Intelligence

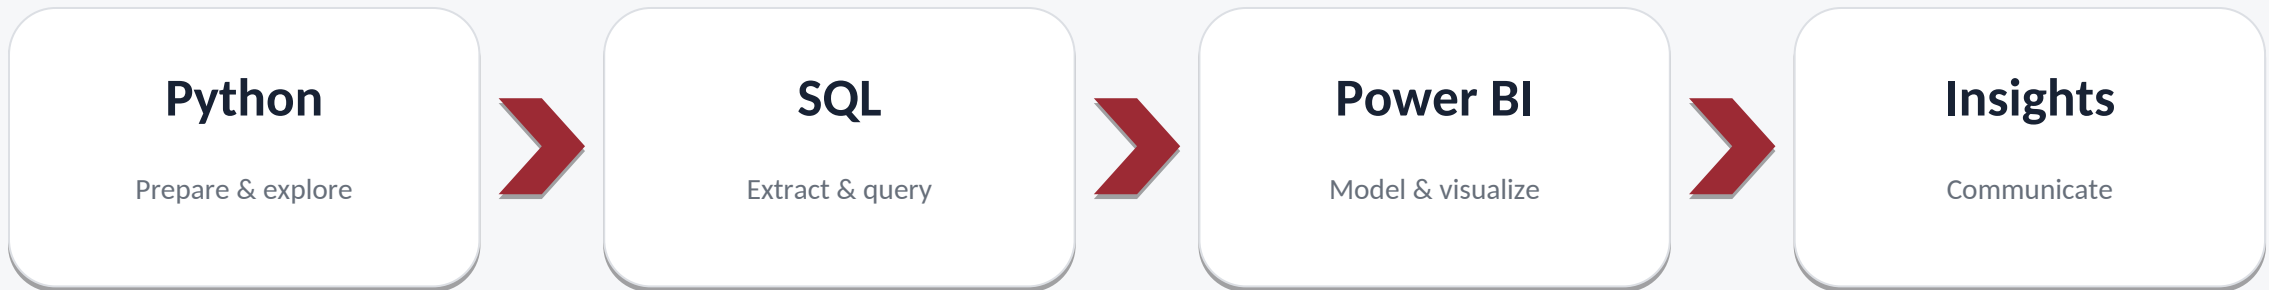

Building interactive dashboards and analytical models

- Power BI visualization — basics to advanced visualizations.
- Data modeling and DAX basics.
- Interactive reporting and dashboard design.
- Power BI Service and collaboration.
- Python & Power BI integration.

Visualization & Integrated Analytics

Connecting tools to communicate insights clearly

KEY PRACTICE

- Use Python for analytical exploration and visualization.
- Use SQL for structured extraction and querying.
- Use Power BI for modeling, interactive visuals and collaboration.

Real-World Projects

Practical application of analytics skills

01 • Sales Performance Analysis

Applied data analytics concepts to study sales performance and generate

02 • Customer Behavior Analysis

Worked with customer-oriented analytics to understand behavior patterns and

03 • Project Workflow

Practiced best practices and structured project workflow from data prep

04 • Practical Integration

Combined Python, SQL and Power BI concepts into an end-to-end analytics l

Capstone Project

E-commerce Sales & Customer Insights Dashboard

CAPSTONE

E-commerce Sales & Customer Insights Dashboard

- Capstone project completed as part of the internship.
- Brings together analytics, visualization and dashboarding skills.
- Focuses on sales and customer insights in an e-commerce context.

Key Skills & Outcomes

Capabilities demonstrated through the internship

Python

Core Python for data analysis and visualization

Pandas

Data cleaning & preprocessing

SQL

Fundamentals, advanced techniques & extraction

Power BI

Visualization, modeling, DAX & Service

Integration

Python + SQL + Power BI workflows

Analytics Projects

Sales, customer behavior & e-commerce dashboard

Internship Certificate

Certificate issued by EduSkills Academy

**CERTIFICATE
OF INTERNSHIP**

PRESENTED TO

Piyush Kumar

has successfully achieved the Internship Credential by completing a 8-week program in the domain of

Data Analytics with Python & Power BI

During the internship, the learner demonstrated proficiency in:

- Welcome to Data Analytics & Environment Setup & Core Python for Data Analysis
- Data Cleaning & Preprocessing with Pandas & SQL Fundamentals for Data Analysis
- Advanced SQL Techniques & Data Extraction & Data Visualization with Power BI - Basics
- Python & SQL Integration for Data Extraction & Power BI Data Modeling & DAX Basics
- Advanced Power BI Visualizations & Interactivity & Python for Data Visualization
- Python & Power BI Integration & Power BI Service & Collaboration
- Real-World Project: Sales Performance Analysis & Real-World Project: Customer Behavior Analysis & Best Practices & Project Workflow
- Capstone Project: E-commerce Sales & Customer Insights Dashboard

This certification recognizes the successful completion of the internship requirements.

Issued on: Jul 27, 2026
Certificate ID: 2026-37C28F17AA
